

Jose Zamudio

zamudio@outlook.com | soyzamudio.com | github.com/soyzamudio

Skills

Software: Javascript, Typescript, Angular, React, RxJS, SCSS, Jest, Cypress, GraphQL, Bootstrap, Tailwind, Netlify, Docer, AWS, GCP, Git, npm, Firebase

Design Tools: Figma, Photoshop, Sketch

Experience

Senior Full Stack Engineer, Virtual Facility – Remote February 2022 – Present

- Orchestrated the creation of a new control center tool, enhancing alarm monitoring from BAS systems through an innovative data architecture. This improved operational efficiency and visibility.
- Slashed CI/CD pipeline time by 85% (~20 minutes to ~3 minutes) through improved E2E testing scripts.
- Enhanced platform usage by 20% by optimizing performance.

Senior Frontend Engineer, Swimlane – Remote November 2021 – February 2022

- Drove developer adoption by upgrading several open-source libraries, enhancing usability.
- Reduced Zendesk support tickets by 80%, improving customer experience by resolving a longstanding bug.

Software Engineer III, Pluralsight – Remote July 2019 – November 2021

- Drove successful integration of Linux Academy and A Cloud Guru platforms, enhancing system efficiency and user experience.
- Spearheaded the development of an innovative course creation tool, reducing creation time by 50%.

Software Engineer III, Rakuten – San Francisco, CA June 2015 – July 2019

- Spearheaded the migration from AngularJS to a component-based Angular 2+ framework, enhancing application performance and scalability. This transition streamlined the development process and improved the overall efficiency and maintainability of the application.
- Implemented a training framework for software engineering interns, achieving high retention and successful full-time employment transitions.
- Developed an Angular component, boosting app downloads by 60%, contributing to a revenue increase of over \$100k in 6 months.

Web Developer, Freelancer – Atlanta, GA January 2012 – June 2015

- Delivered 15+ web development projects to local businesses with 100% satisfaction rate, boosting website traffic by 30% through EO and responsive design.

Projects

Ciclo Dispensary github.com/soyzamudio/ecommerce

- Pioneered a comprehensive e-commerce platform, significantly enhancing user engagement and sales potential. Utilized Next.js 13, React, and Typescript for a seamless blend of intuitive UI and robust backend functionality.

MedsApp github.com/soyzamudio/meddsapp-fe

- Developed a cutting-edge patient management and communication tool, revolutionizing patient-doctor interactions with real-time video communication. Implemented using Angular and Firebase for high efficiency in data handling and user experience optimization.
